Interviews

Our organization has invested much work in collecting first-hand oral testimonies about Jewish life in Galicia and Bukovina. These interviews were conducted as part of our annual expeditions to Galicia. Most of the interviews are in Russian or Ukrainian, with some offering an English translation. The interviews give firsthand description of various aspects of Jewish life before the Holocaust. It goes without saying that the generation capable of telling the story of Galician and Bukovinian Jewry is slowly disappearing,and we therefore see this project as a last opportunity to obtain first-hand information from these living testimonials to Jewish life in these regions.

We invite all descendants of Galicia and Bukovina who are interested in contributing to this important cause to contact us. Please click here
